S ARE THINKING

WE THINK WHAT OUR  
CUSTOMERS ARE THINKING

Full Service Provider for

# Electronic Manufacturing Services

Our offer:

Vision – Passionate Electronic  
Impulses – Network Thinking –  
Know-How – Individual Solutions  
with State-of-the-Art Technologies

Your advantage /  
One-Stop Shopping:

Development – Procurement –  
Material Handling – Logistics – Samples –  
PCB Assembling – Test Systems –  
End Device Assembly – Automated  
Manufacturing Solutions

#### Locations:

##### **Klagenfurt a. W. / Austria (Headquarters)**

Full Range Production  
8.100 m<sup>2</sup> production area

##### **Fonyod / Hungary**

Automated processes,  
manual & end-device assembly  
3.000 m<sup>2</sup> production area

##### **March-Freiburg / Germany**

prototyping, small and  
medium-sized series  
2.100 m<sup>2</sup> production area

##### **Kassel / Germany**

Sales Office

##### **Hong Kong / China**

Sales Office & Procurement

##### **Shenzhen / China**

ISO 13485  
ISO 14644-1 (ISO8)  
VDA 19-2 SaS2

The prominence of electronics is often veiled. All too easily, perfect processes and functionalities are taken for granted in our daily lives, we hardly ever think about all the know-how and innovation required to create these processes.

According to our motto **“Focus on the Customer”**, we excel in extraordinary flexibility, speed and reliability and deliver everything from one source. We are independent and customers appreciate our flat management structures.

We have been manufacturing electronics in Klagenfurt for more than 40 years. This long-standing knowledge is used for our work on a daily basis; it enables us to deliver on time, at the best quality possible: driven to find future-orientated solutions with our fingers on the pulse of time.

**„We think what our customers are thinking“** is more than a slogan for us - it is the way we work for our customer's benefit. Our highly motivated and well trained staff virtually guarantees innovation and customer satisfaction. Our many awards confirm that we are on the right track and motivate us to continue on our path of peak performance.

With a highly dedicated team of experts, we have put our international market position on solid ground and vouch for successful and fair long-term business relationships.

## Our Core Competences

Innovation and quality are the foundation.  
Efficient project management is the top priority.

### **AUTOMOTIVE**

- Body Control Applications
- Power Train Applications
- LED applications
- E-Mobility

### **MEDICAL**

- Power supply
- Diagnostic electronics
- Dental electronics

### **INDUSTRY**

- Embedded Solutions
- Power supplies and power electronics
- LED applications
- Measurement systems

### **RENEWABLE ENERGY**

- Power electronics
- Controls and regulations

# WE THINK WHAT OUR CUSTOMERS ARE THINKING

WE THINK WHAT OUR CUSTOMERS ARE THINKING

- DEVELOPMENT & DESIGN
- NEW PRODUCT INTRODUCTION / NPI
- MATERIAL MANAGEMENT
- ELECTRONIC MANUFACTURING

- Our Team develops individual solutions for you. Regardless of whether you need a completely new product or just design optimization – you define the scope of our service. We are on your side!
- „New Product Introduction“. A special cms service to bring your innovative product to serial production.
- Due to our global sourcing, we can offer our customers the best cost-benefit ratio. (Best Cost)
- The assembly and mounting of PCB and devices is our core competence. This is achieved using highly automated processes in Klagenfurt and optimized manual processes in Fonyód. Our location in March-Freiburg is specialised in prototyping and small to medium-sized series production.

## TEST PLANNING & TESTING AUTOMATION QUALITY & ENVIRONMENT SERVICES IN EMS

Planning of tests takes place at the beginning of any development process and ends with the implementation of the test concept. (Design for Testability / DfT)

Modern hard- and software solutions guarantee automation of processes and are developed in-house from start to finish.

Thanks to the quality of our services which has often been honored by our customers, your products are in the very best hands with us.

We are an active member of the ZVEI Initiative – **Services in EMS** – and guarantee utmost competence along the entire value-added chain.

## Advanced manufacturing technology with decades of experience.

Our daily business and core competence is the assembly and mounting of Printed Circuit Board and devices. We secure our position and competence with permanent training of our staff.

Production processes that require above-average labor are handled efficiently at our production site in Hungary for cost reasons. Production with highly automated manufacturing solutions is optimized at our site in Klagenfurt. We would be happy to develop the best process solution for your product, as well.

### **Main production processes:**

- Assembly (THT and SMT)
- Wave soldering
- Selective soldering
- Pin insertion technique
- Selective coating
- Separation
- Mounting
- Testing
- Automated manufacturing solutions
- High precision optical drilling
- Environmental tests
