

## Commodity Manager Mechanic (f/m/d)

Extent of employment: Full time, Fonyód

We are looking for a committed and experienced purchasing expert for our location in Fonyód to support our team in the procurement of mechanical components.

### Your tasks:

- Independent support and further development of procurement for mechanical components
- Conduct of market analyses and identifying delivery potential
- Negotiation of prices, conditions and contracts with national and international suppliers
- Ensuring material availability and optimizing inventory levels
- Work closely with production and other departments to ensure an efficient supply chain
- Identification and implementation of cost reduction potential as well as continuous improvement of purchasing processes
- Risk management and ensuring topics like quality and delivery dates
- Support the launch of new products
- Responsible for budget planning and monitoring for mechanical components

### Your profile:

- Completed higher education of applied sciences or business studies
- At least 2-3 years of experience in purchasing of mechanical components, preferably in the electronics industry or semiconductor industry
- Excellent knowledge in English and MS-Office
- Confident manner and excellent communication skills and negotiation skills

### Our offer:

- Interesting, varied and responsible position in the company
- Attractive career and development opportunities
- Motivating working atmosphere and working in a powerful team
- Various other benefits (home-office option, discount meals, housing support)
- Outstanding wages

Do you find our job offer interesting and want to become part of our team? Then we look forward to receiving your CV **in English and Hungarian**
